

CLASSROOM NEWSLETTER

February 2026 | Grade 3

What We Learned

In January, we explored Witsuwit'en winter travel. Students created mini toboggans and tested them on an obstacle course by attaching them to RC cars! Keep an eye on spaces for posted photos and assessments.

In Science, we are continuing to learn about different types of thermal energy. So far, the students are showing understanding of convection, conduction, and radiation.

In math, we are learning and practicing different subtraction and addition strategies with numbers to 1000. The students work with place value has made addition and subtraction strategies come very quickly.

The students had a lot of fun skating! This month, we will head to the mountain for cross-country skiing!

Reminders

Please hand in permission slips for cross-country skiing. It costs \$3 per session for a total of \$6 per student.

Skating cost \$3 per student. I will send a notice home if you have not paid yet.
