

# GRADE 3 NEWSLETTER

October 2025

## What We Are Learning

### Literacy

- Our primary-wide phonics groups have had a great start! Please continue weekly home practice with your child. This includes decodable passages, heart word practice, spelling chains, and roll and reads.
- As a whole class, we have been practicing writing full sentences, and started story workshop where students build stories with loose parts then write their ideas.

### Place Value in Math

We are continuing expanding our number sense and becoming familiar with place value from numbers 1-1000. This includes composing and decomposing numbers, building, drawing, math games, and written practice.

### Science

We are just starting our first Science unit about Matter! The class is very excited to experiment and explore.

## Reminders

If you do NOT wish to consent to the use of our district online learning portfolio, Spaces, please contact me. A form was sent home earlier this week.
